Lonsdale Hotel

Gardens at Night were approached by the owners of the Lonsdale Hotel, to supply and install a lighting system to compliment their new Alfresco area – exterior beer garden & dining room – which overlooked an extensive new garden and dry creek.

This is set on the eastern side of the hotel with views from all entertaining areas. A significant amount of ground recessed lighting fixtures are strategically placed to highlight the new feature palms and existing large gum trees. A dry creek with purpose lighting winds through lush palms and exotic features plants.

Mid left : Up-lit feature pines as viewed by poker machine entrance

Left: Up-lit feature pines as motel entrance

All lighting is time clock or PE Cell controlled for automatic operation and efficiency. Due to the security boundaries of the hotel all fixtures were concreted into position. High output, high efficiency lamps were installed to keep maintenance and operational costs to a minimum.

The installation was completed within the time frame allowed and proves to be a very valuable proportion of the hotel upgrades.

Visit the Maison Display Centre at Rear 57 Rundle Street, Kent Town Monday to Friday 10.00am – 5.00pm
