## Semaphore Hotel

Gardens at Night had been approached by the owners of the Semaphore Hotel, South Australia, requesting us to design, supply and install a lighting system that will compliment their newly improved and designed beer garden, poker machine entrance and a smoker's area.

Keeping in mind the OH & S requirements, Gardens at Night designed a light show that is pleasant to the eye and security conscious.

Left: up-lit planter box  
Below: up-lit sheer decent*

A blend of Amber and White LED lighting, together with garden up-lights, Otoma wall lights and Nautilus pond lights – which are all pressure die-cast brass housing, including all spikes and brackets, stainless steel strews, made to last and non-corrosive, highlight the garden foliage and timber screens.

Various wattage lamps and LED's, changed the contrasting light levels to create a smooth gentle lighting ambience. Water features with strong lighting created visual points away from the high concrete walls that surround the area.

All lighting and water features have been set to time clock controllers for automatic operation and efficiency. The complete installation is 12V or 24V for safety. Low maintenance lighting and lamps is a key feature of this design.
