## Ambience in North Adelaide

Together with Nadia Matijecic of Adelaide Garden Design, Gardens at Night's supplied and installed security, ambient lighting for stunning residence situated in North Adelaide, allowing the customer to relax in the newly designed area outside the usual daytime hours.

In a busy suburb where land is precious this project design utilised the limited space to its maximum potential. Whether it be reading a book to unwind after a hectic day or entertaining guests for a dinner party, the courtyard has endless appeal.

*Top: Plant silhouette with dry water feature*

*Mid: Courtyard lit, ready for entertaining*

*Below: Natural colour brought to life*

Feature planters, dry water feature and timber deck surround the paved entertaining area, which are now visual by night.

A combination of uplighting in garden planters, in deck uplighting featuring back-lit pots, adjacent down lighting and low height ground lighting to highlight the dry water feature, blends well with the surrounding landscape. Fitted with a hand held RF remote for simple operation and security.
